

Everything you need in one place for the best Air Cargo Tracking experience

Exceeds IATA ONE Record data sharing standards

Over 100 airlines can now be reached through OneRecord by Nexshore Application built on the [IATA ONE Record](#) open-source specification.

Nexshore has teamed up with CHAMP Traxon to provide a central repository for all your Air Cargo track and trace needs. Providing both a WebApp and a full set of API's for system-to-system integration. Post flight data can now be easily integrated into your own system or downloaded into Excel or Sheets files for further reporting and analysis.

Many third-party websites offer you and your post flight teams an opportunity to enter an airwaybill number and retrieve the status of your shipment. Image the amount of time saved and lowered costs if you put this on 'Auto-Pilot'.

Keep your customers happy and keep them coming back to you knowing your ability to keep them constantly updated.

## ANALYTICS

Get valuable insights into Airline performance on your shipments by ranking them on scores like (1) Flown as booked (2) Arrived as Promised (3) Successful Deliveries (4) Offloads (5) Re-books (6) Missed Arrivals and more.

*Send all your customers live updates on their Air Cargo shipments. Keep e-commerce customers happy with a constant flow of updates.*

## SHIPMENT VISIBILITY AND NOTIFICATIONS

Set up Text and Email alerts to get complete shipment visibility on the go. All milestone updates on the Shipment (1) Received at Origin (2) Ready For Carriage (3) Manifested (4) Departed (5) Arrived (6) Delivered. Many intermediate status can also be configured.

**SET UP YOUR OWN PAGE FOR TRACKING – USE IT FOR MARKETING MORE PRODUCTS AND SERVICES**

## OneRecord

Global Network

Share shipment data securely  
anywhere, anytime

integration and storage needs

## OneRecord by Nexshore Features

Simply upload your airwaybill numbers via CSV , email them or set up automated API submission, and our track and trace module will take over providing you with the following:

- ▶ Standardized freight status updates from over **100 leading airlines**
- ▶ Alerts when consignments miss their intended flight (Alerts can be sent via email, SMS or social media e.g., WhatsApp for business)
- ▶ Targeted On-demand consignment monitoring for high profile / value shipments for real-time updates
- ▶ Updates direct to your customers via email, Texts or other social media platforms. Enable effective E-Commerce operations.
- ▶ Delivery close-out times sent to the transport department or your third-party trucking companies
- ▶ Automated Real Time Proof of Delivery (DLV) reports
- ▶ 7 days post flight rechecks (in case of offloads)
- ▶ Alerts when consignments miss their intended arrival
- ▶ Daily and weekly reports for all your consignments direct to your email inbox
- ▶ Performance reports for each Airline e.g., 'Flown as Booked' or 'Arrived as promised'
- ▶ Spot price per kilo rates for your routes i.e. Are you paying too much to the Airline for your shipments? (Based on spot price index)
- ▶ Invite other partners into your network
- ▶ Work with other forwarders on coordinated deliveries
- ▶ Streamline your entire shipment tracking capabilities without changing a single in-house system
